1 The Trello Board

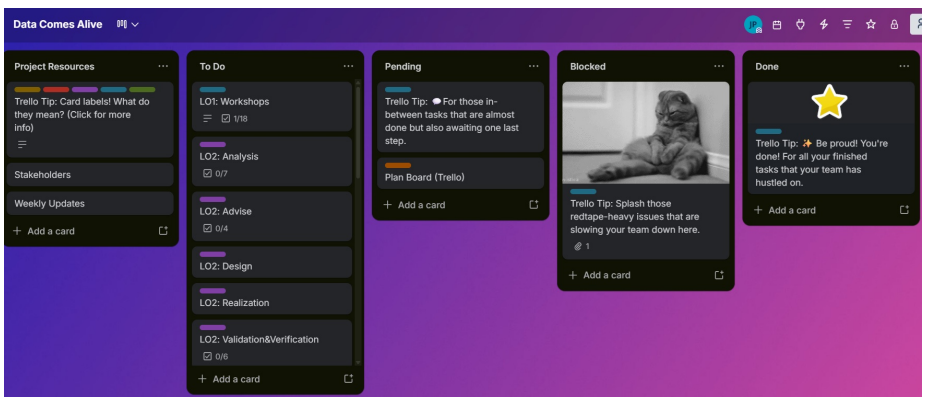

Figure 1: Trello Plan Board

In this document, I aim to show the plan board that I created using Trello. Figure 1 displays the main board for my project 3 entitled "Data Comes Alive". Figure 2 displays the full to-do list I made for each learning outcome which I hope to complete in the entire duration of this project.

Figure 3 displays the checklist of workshops I can join for Week 9 and 10 which will contribute as an evidence in the learning outcome 1 - Orientation.

This will still be updated with the corresponding due dates for each task. And I plan to organize each task according to priority. Since there will also be a group project together with this individual project, the timeline will be tricky. So I plan to set a deadline for each task in a way that I will have some buffer to anticipate unexpected events such as emergencies.
